

50s to the 60s Culture Project

The goal of this project is to help us understand how American culture changed from the 1950s to the 1960s. Your group is responsible for “teaching” the rest of the class about the cultural innovations or contributions of your assigned category to American life and how they changed from one decade to the next. Below is a list of possible categories to cover. Choose one and then research the developments in that field, providing clear examples and explaining the significance of each innovation. Each group member will be responsible for research, and the research must be valid and reliable.

Fill your slides with images and make good use of **the comment section of each slide!!!**
An example has been provided on Weebly under Readings/Assignments.**

Presentations must:

1. Contain relevant information that increases understanding of the topic
2. Be created using Google Slides and shared with your teachers
3. Have CLEAR examples (an audio and visual component)
4. Be coherent and organized
5. Not exceed “10 minutes” were you to present it (so roughly 10 slides)
6. Include the most popular examples of the topic
7. Be creative
8. Include a Works Cited slide formatted using MLA requirements

Suggested Categories:

- Music
- Dance
- TV
- Art
- Fashion
- Film
- Food
- Toys/Games
- Theater/Performance
- Sports
- Technology
- Architecture

*Have fun with this, kids.
